DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Superko on February 05th, 2004. The application has been amended as follows:

Please cancel claims 14 and 21-48.

Please change claim 1 as follow:

Claim 1:

"monitor system for a semiconductor process comprising:

a test wafer including at least one sensor, the test wafer being positionable on a supporting structure in a process chamber of a semiconductor processing system;

an interface including at least one contact electrically connectable to the sensor when the test wafer is positioned on the supporting structure; and

circuitry electrically colmectable to the contact and designed to process signals transmitted from the sensor;

wherein the circuitry measures at least one property selected from the group consisting of net floating potential, net current density, electron energy distribution at the front side of the test wafer, and displacement current."

Allowable Subject Matter

2. Claims 1-13, 15-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

claim 1 recites, inter alia, "monitor system for a semiconductor process comprising circuitry electrically connectable to the contact and designed to process signals transmitted from the sensor; wherein the circuitry measures at least one property selected from the group consisting of net floating potential, net current density, electron energy distribution at the front side of the test wafer, and displacement current."

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Sprogis (U.S. 6,492,189) disclose Semiconductor defect monitor for diagnosing processing-induced defects and Inaba (U.S. 5,055,715) disclose a Semiconductor integrated circuit provided with monitor-elements for checking affection of process deviation on other elements.

Notice: claims 21-48 do not disclose the above allowable limitations.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
